

# Vandal Guard Latch Protector – Product Specification Sheet

The Vandal Guard Latch Protector is a heavy-duty stainless steel protective cover designed to shield the door strike and latch hardware on Portland Loo front doors from tampering, prying, and vandalism. Its robust profile enhances security while maintaining a clean, architectural appearance suitable for high-use public environments.

## Material

- Standard: 1/8" thick Type 304 stainless steel
- Optional: Type 316 stainless steel available upon request for enhanced corrosion resistance

## Construction

- Precision-formed stainless steel construction
- Brushed finish suitable for exterior public installations
- Designed to resist impact, prying, and forced-entry attempts

## Mounting & Hardware

- Supplied with tamper-resistant mounting hardware
- Field-mountable to any Portland Loo front door
- Designed for straightforward retrofit or new installation

## Application

- Protects door latch and strike area from vandalism and misuse
- Ideal for parks, transit facilities, streetscapes, and other high-traffic public restrooms

## Compatibility

- Compatible with all Portland Loo front door configurations
