

Vandal Guard Latch Pull Handle

Product Specification Sheet

Product Overview

The Vandal Guard Latch Pull Handle is a heavy-duty stainless steel protective handle assembly designed to shield and reinforce the door latch and lock area on Portland Loo front doors. The formed guard profile protects the lock cylinder from tampering, prying, and vandalism while providing a durable pull surface for users.

Material

- Standard: 1/8" thick Type 304 stainless steel
- Optional: Type 316 stainless steel available upon request

Construction

- Precision-formed stainless steel construction
- Brushed stainless steel finish
- Integrated lock cylinder opening
- Designed to resist impact, prying, and forced entry

Finish

- Brushed stainless steel
- Low-glare exterior-grade finish

Mounting & Hardware

- Through-door mounting configuration
- Compatible with tamper-resistant fasteners
- Suitable for retrofit or new installation

Application

- Protects latch, pull area, and lock cylinder
- Provides durable pull handle for high-traffic use
- Ideal for parks, transit facilities, and public restrooms

Compatibility

- Compatible with all Portland Loo front door configurations
