

REPLACEMENT PART · TOILET SEAT

ELONGATED TOILET SEAT

BEMIS 10CT · COMMERCIAL HEAVY DUTY

The open-front, elongated Bemis seat that comes standard in every Portland Loo. Made in the USA and shipped with the required factory hardware.

Elongated	300 Series	Z124.5	USA
OPEN FRONT, LESS COVER	STAINLESS POSTS & PINTLES	COMMERCIAL HEAVY DUTY	MADE IN AMERICA

OVERVIEW

The Bemis 10CT is a heavy-duty, injection-molded solid plastic seat built for public restrooms. It is the elongated seat that every Portland Loo ships with, and the right replacement when a seat is worn or damaged.

Its check hinges use non-corrosive 300 Series stainless steel posts and pintles, and the STA-TITE® Commercial Fastening System keeps the seat tight on the bowl. White is standard, and black is available on request.

KEY FEATURES

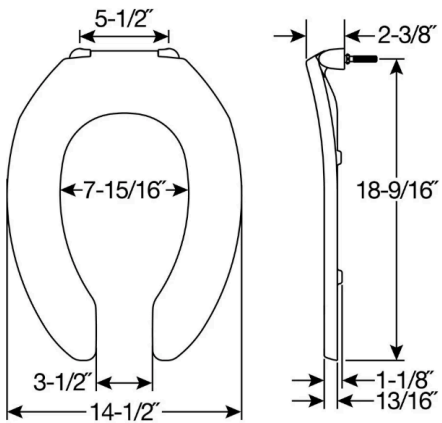

- 01 Built for public use**
Solid injection-molded plastic, rated Commercial Heavy Duty under IAPMO/ANSI Z124.5-2013.
- 02 Stays tight**
The STA-TITE® fasteners have snap-off nuts that set the correct torque, so the seat doesn't work loose.
- 03 Won't corrode**
300 Series stainless steel hinge posts and pintles.
- 04 Four bumpers**
Molded-in bumpers support the seat on the bowl.

ORDERING OPTIONS

COLOR	STANDARD	AVAILABLE ON REQUEST
Seat color	☐ White ☒ Std	☒ Black

Top view dimensions: 5-1/2" (hinge post spacing), 7-15/16" (opening), 3-1/2" (front gap), 14-1/2" (width).
Side view dimensions: 2-3/8" (hinge post height), 18-9/16" (distance from hinge bolts to front), 1-1/8" (hinge post diameter), 13/16" (hinge post offset).

Dimensions. Top and side views.

Side view. Bumpers and STA-TITE hinge bolts.

INSTALL TIP — Center the seat on the bowl and tighten the STA-TITE nuts with a 5/8" wrench until the lower part snaps off. That sets the right torque. For bowls with restricted access to the bolt holes, follow the alternate steps in the Bemis instructions.
