OVERVIEW

The ASSA ABLOY ACCENTRA indicator kit upgrades an existing Best or Schlage sectional mortise lock with a bright status window. When the door is locked the window turns red, and when it's free it shows green, so there's no guessing and no rattling the handle.

The curved window and reflective panel stay readable from the side and in low light. Kits can go on the outside, the inside or both sides of the door. The unit pictured is the exterior indicator, part BE190 626 10.

01 PATENTED CURVED WINDOW

The status window is 25% larger than competing indicators and can be read across a 180° viewing angle.

03 RETROFITS EXISTING LOCKS

Fits a variety of Best and Schlage mortise lock functions. It does not void the UL listing when installed correctly.

02 VISIBLE IN LOW LIGHT

A reflective coating on the indicator panel keeps the status easy to see at dusk and in dim interiors.

04 WORDING TO SUIT THE SITE

Choose Unlocked/Locked, Vacant/Occupied, icons only or French wording, in green or white. More options on request.

WHY IT MATTERS

A clear status window cuts down on door rattling and knocking, tells maintenance crews at a glance if the Loo is in use, and gives users confidence their door is locked.
