— OVERVIEW

The Lumi Lite is the LED strip used in the Portland Loo's interior light fixture. It comes installed from the factory in actinic blue, and is also available in full-spectrum bright white or a 50/50 blue/white mix.

Each strip is sold individually, but we recommend replacing both strips at the same time for even color and brightness. The slim aluminum housing mounts on the existing brackets, and the wiring is accessible in the roof-mounted gang box.

— KEY FEATURES

- 01 Direct replacement**
Fits the Portland Loo's 12V low-voltage interior light fixture.
- 02 Easy install**
Mounts on the existing brackets. Wiring connects in the roof-mounted gang box.
- 03 Three color options**
Actinic blue (stock), full-spectrum bright white, or 50/50 blue/white.
- 04 Slim, low-profile housing**
Less than 1/2" high and 1-1/4" wide. Designed and built in the U.S.
