OVERVIEW

This Covidien multi-purpose sharps container with a hinged lid is the bin that fits the Madden Vandal Guard Sharps Enclosure. The rotor opening and hinged lid accept a variety of sharps, and the lid closes temporarily between uses or locks permanently when the container is full.

Containers are sold singly or in bulk cases of 20 at discounted pricing. Keeping a case on hand makes it easy for crews to swap a full bin on the spot.

01 FITS THE MADDEN ENCLOSURE

Sized for the Vandal Guard Sharps Enclosure, which limits airflow to keep a fire from spreading.

03 LOCKS FOR DISPOSAL

When full, the lid locks permanently so the container can be removed and disposed of safely.

02 ROTOR OR HINGED LID

The adjustable rotor opening or the hinged lid accepts a variety of sharps safely.

04 EASY TO STOCK

Simple assembly, and the containers nest to save storage space. Safe to autoclave or incinerate.

SEAL & SWAP

Maintenance and cleaning techs should seal and swap the bin every time it gets full. Never overfill past the fill line or try to empty a container.

SPECIFICATIONS
