VANDAL GUARD DISPENSER

FOAMING SOAP & SANITIZER

A locking stainless steel foaming soap or sanitizer dispenser built for high-traffic public restrooms, made to fit the Portland Loo.

1,000 mL	≈ 2,500	16 GA 304	8-pc
REFILL BAG CAPACITY	DOSES PER REFILL (0.4 ML)	STAINLESS; 316 ON REQUEST	TAMPER-RESISTANT HARDWARE

OVERVIEW

The Vandal Guard is a heavy-gauge stainless steel dispenser made in the USA by Madden Fabrication for public restrooms. A keyed barrel cam lock keeps the refill inside secure, and every fastener is tamper resistant.

It mounts directly over the Portland Loo's Generation 1 gravity-flow dispenser, or on the outside panels next to your existing hand-wash station. It takes every soap and sanitizer refill bag sourced through Madden Fabrication.

KEY FEATURES

- 01 Built for abuse**
16 gage type 304 stainless steel with a brushed finish; 316 available on request.
- 02 Secure**
Tamper-resistant barrel key cam lock and 8 pieces of tamper-resistant hardware matching the exact specs used to build the Portland Loo.
- 03 Drop-in upgrade**
Mounts over the Gen 1 gravity-flow dispenser or beside the existing hand-wash.
- 04 Low running cost**
1,000 mL bags at 0.4 mL per press, about 2,500 doses per refill.

CONSTRUCTION & SPECIFICATIONS

Manufacturer	Madden Fabrication, made in the USA
Material	16 gage type 304 stainless steel; 16 gage type 316 on request
Finish	Brushed stainless steel
Lock	Tamper-resistant barrel key cam lock
Hardware	8-pc tamper-resistant hardware set, matching the exact specs used to manufacture the Portland Loo
Mounting	Over the Portland Loo Generation 1 gravity-flow dispenser, or on the outside panels adjacent to the existing hand-wash
Refill capacity	1,000 mL (1.0 L) foaming soap or sanitizer bag
Dose	0.4 mL per press; about 2,500 dispenses per refill
Compatible refills	All soap and sanitizer refill bags sourced through Madden Fabrication
Estimated refill cost	From \$9 per bag, depending on formula, applicable taxes and market conditions
Operation	One-handed push, no tight grasping or twisting, 5 lbf or less to activate

ADA ACCESSIBILITY

Installed per Madden Fabrication's recommendations, the dispenser is intended to comply with the 2010 ADA Standards for Accessible Design and ICC A117.1, including the operable-parts requirements, reach ranges and protruding-object limits. Final compliance depends on the mounting height, location and clearances chosen by the installer.

TYPICAL APPLICATIONS — Public restrooms, parks and recreation facilities, transit centers, and schools, universities and civic buildings. Pair it with Madden Fabrication's foaming soap or sanitizer refills.
