MADE TO MATCH YOUR LOCK SET

4-pc hardware

TAMPER RESISTANT, MATCHES THE LOO

OVERVIEW

The Vandal Guard latch protector is a heavy-duty, precision-formed stainless steel guard that covers the latch and strike area of the Portland Loo's main door. Its channel profile blocks prying tools and tampering at the gap between door and frame, while keeping a clean architectural look on the Loo's exterior.

It comes standard on all new Loo builds and is now available as a retrofit kit for existing Loos. Each guard is custom made to fit the lock set already on your door, so please tell us which lock set is installed when you order. The kit ships complete with a 4-piece tamper-resistant hardware pack that matches the security hardware used across the Portland Loo.

KEY FEATURES

01 Stops prying

Shields the latch and strike from tampering, impact and forced-entry attempts.

03 Heavy stainless

1/8" Type 304 stainless with a brushed, exterior-grade finish. 316 on request.

02 Custom made to fit

Built to the size of your installed lock set for a clean, tight fit.

04 Complete retrofit kit

Ships with 4 tamper-resistant fasteners matching the Loo's existing hardware.
