316 AVAILABLE ON REQUEST

Guard + pull

FORMED HANDLE FLANGES EACH SIDE

Sold as a pair

ONE FOR EACH CHASE DOOR

8-pc hardware

TAMPER RESISTANT, MATCHES THE LOO

OVERVIEW

The Vandal Guard latch guard pull handle is a heavy-duty, precision-formed stainless steel plate that covers the latch and lock area of the Portland Loo's chase utility doors. Its center plate surrounds the lock cylinder to stop prying and tampering, and the two formed flanges give maintenance staff a solid pull to open the door.

The guards are sold as a pair, one for each chase door, and ship complete with an 8-piece tamper-resistant hardware kit that matches the Portland Loo's existing hardware. They mount through the door and fit around the Schlage B561B one-way deadbolt used on the chase doors.

KEY FEATURES

01 Protects the lock

Shields the cylinder and latch from prying, impact and forced entry.

03 Heavy stainless

1/8" Type 304 stainless with a brushed, low-glare exterior finish. 316 on request.

02 Built-in pull handle

Formed flanges on both sides give a durable grip for high-traffic service use.

04 Complete kit

Pair of guards plus 8 tamper-resistant through-bolts matching Loo hardware.

CONSTRUCTION & SPECIFICATIONS

Material	1/8" thick Type 304 stainless steel; Type 316 available on request
Construction	Precision-formed one-piece guard with formed pull flanges and an integrated lock cylinder opening
