VANDAL GUARD SHARPS CLEAR POLYCARBONATE ENCLOSURE

A wall-mounted, clear polycarbonate housing that secures a 2-gallon sharps container, with an air-reduction design that helps keep fires from spreading.

1/8" PC	2 gal	Air-reduction	Retrofit
CLEAR POLYCARBONATE	COVIDIEN SHARPS CONTAINER	STARVES FIRE OF OXYGEN	FOR PORTLAND LOO RESTROOMS

OVERVIEW

The Vandal Guard Sharps Enclosure gives Loo users a safe place to throw away needles while keeping the container itself out of reach. It is built from 1/8" clear polycarbonate, so maintenance staff can see how full the container is at a glance.

Its air-reduction design limits airflow inside the enclosure. If someone drops burning material through the slot, the fire is starved of oxygen, which helps keep it from spreading into the Loo's utility chase.

KEY FEATURES

- 01 Fire-resistant design**
The polycarbonate air-reduction design starves flammable material of the oxygen it needs.
- 02 Shatter resistant**
1/8" polycarbonate panels stand up to impact in public restrooms.
- 03 See the fill level**
Clear panels show the contents for safety and service checks.
- 04 Easy to service**
A latched, hinged front opens to swap the 2-gallon Covidien container.

CONSTRUCTION & SPECIFICATIONS

Manufacturer	Madden Fabrication
Material	1/8" thick clear polycarbonate; shatter and impact resistant
Construction	Precision-cut panels with reinforced seams and joints; internal angled chute; latched, hinged front for service
Fire safety	Polycarbonate air-reduction design starves flammable material of oxygen to keep fires from spreading to the utility areas
Container	Covidien 2-gallon sharps container, red; 10" H × 7.25" D × 10.5" W
Finish	Clear, smooth, low-glare and easy to clean
Mounting	Wall mounted through the back flange; built as a retrofit for Portland Loo restrooms; compatible with tamper-resistant hardware
Accessibility	Designed to maintain ADA compliance when installed per guidelines
Applications	Parks, transit facilities, streetscapes and other high-use public restrooms

Front 3/4. Latched front and angled chute.

Opened. Enclosure with the 2-gallon container removed.

Installed. In a Portland Loo utility area.

SERVICE TIP — Replace the Covidien container when contents reach the "FULL" line on its label. Seal the container lid before removing it, and dispose of it per local medical waste rules.
