REPLACEMENT PART HAND WASH STATION

Hemispherical Hand Wash Bubbler

Acorn option -BPH: a vandal- and ligature-resistant 303 stainless spout for the Loo's exterior hand-wash station, with a 0.5 GPM flow.

303 SS	0.5 GPM	Hemispherical	Lead free
SATIN FINISH	FLOW RATE	LIGATURE RESISTANT	NSF 61 §9 · PL 111-380

OVERVIEW

The -BPH bubbler is the spout at the top of the Portland Loo's exterior hand-wash basin. A low, rounded dome with a single outlet gives nothing to grab, twist or tie onto, so it holds up in high-abuse public settings.

It's made from solid type 303 stainless steel with a satin finish and meets lead-free requirements for drinking water. It's a direct replacement for a worn or damaged spout, and pairs with the -PBH hemispherical pushbutton.

KEY FEATURES

01 **Vandal resistant**
A smooth, low-profile dome with no edges to pry, twist or break off.

02 **Ligature resistant**
Designed to prevent use as a suicide device.

03 **Water saving**
A 0.5 GPM flow rate for hand washing.

04 **Lead free**
Meets NSF/ANSI 61 Section 9 and Federal Public Law 111-380.

Hemispherical Hand Wash Bubbler

SERVICE TIP

If the flow is weak or sprays off to one side, check the outlet for mineral buildup or debris before replacing the bubbler. Replacing the bubbler and the -PBH pushbutton together refreshes the whole hand-wash station.
